The Better World Fund will support the Virtuosa Foundation

PLAYING FOR THE BETTER, FOR CHILDREN

The Virtuosa Foundation carries out renovation projects for children hospitals in Poland turning old interiors into the most modern designs to impact on children’s well-being.

the Virtuosa Foundation is now focusing as a matter of urgency on renovation of the admission area of the Children’s Memorial Health Institute in Warsaw to enlarge this space and make it one of the most modern and kid’s friendly hospital entrances in the whole country. To make Polish kids feel better and make the first impression as beautiful and welcoming as possible in the midst of tragic circumstances.

The leadership of its CEO is one of a kind

– Patrycja suspended her violin worldwide career after 23 years to “play for the better” with excellent architects, designers and business world representatives. Her endless inspiration is personal story created by her son’s heart disease. Turning difficult moments into determination, the business world follows her acting with good reason and heart.

Virtuosa Foundation organizes charity gala concerts with top world opera stars as well as Patrycja’s recitals all over the world to open hearts with the deepest sound of the soul. To gain the smile of the little patients.

Patrycja Piekutowska will grace us with a special performance during the gala dinner

A smart reforestation initiative

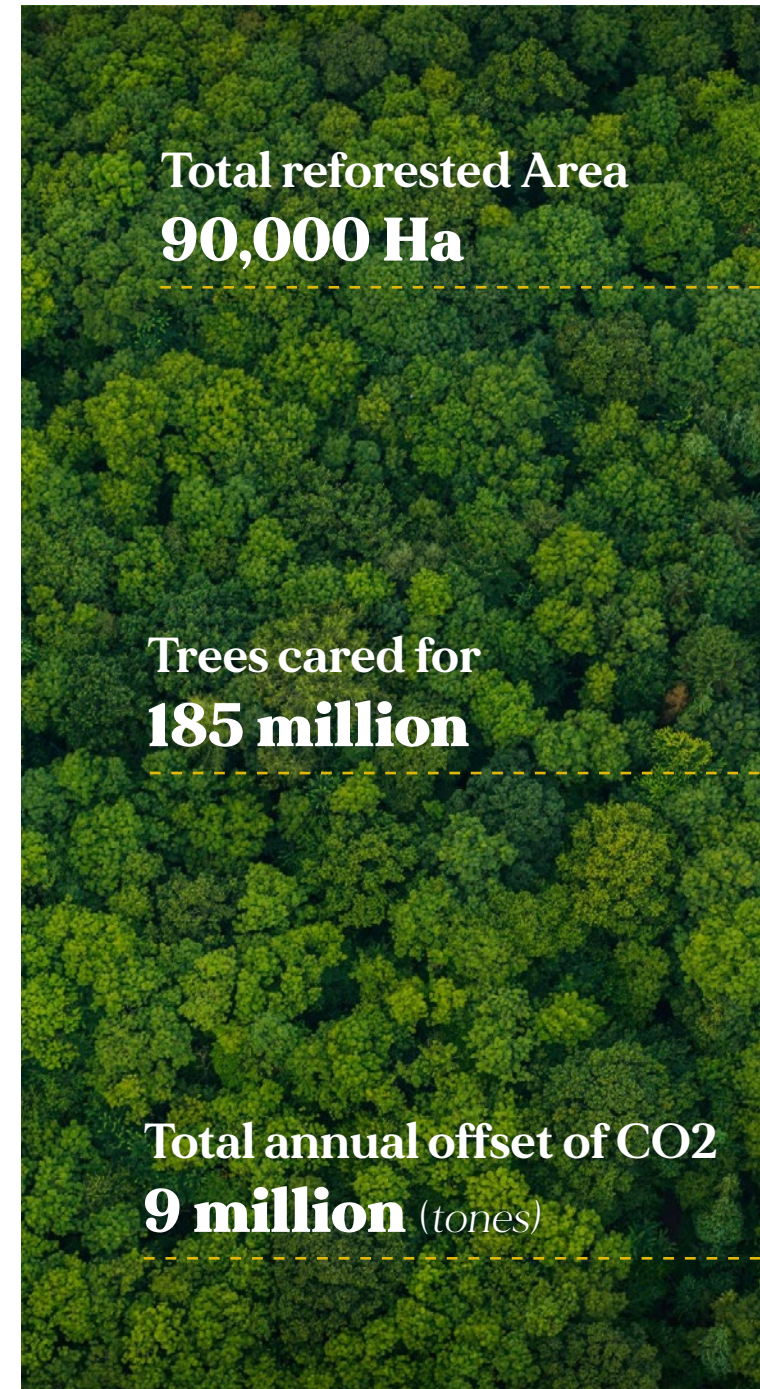

As part of its efforts to fight global warming, protect our environment and biodiversity, and lead to the restoration of nature's ecosystems, the Better World Fund is partnering with the Floresta project in bringing a fresh wind of innovation to the green sector. More than a reforestation initiative, the Floresta project paves the way to a more sustainable future, transcending our global understanding of sustainability, successfully combining the need for change and the will for a profitable venture.

This innovative concept is the result of the recognition of the unbreakable ties between deforestation, climate and the social fragility of adjacent indigenous communities, and the deep understanding of the power and hidden capacity of creative financial models to reshape realities.

Presenting the first profitable economic model for reforestation, conservation, and social impact efforts, the Floresta project demonstrates that positive social and environmental impact is not a liability, but rather a financial opportunity.

In addition, through the development of a proprietary financial tool, the Floresta Tree Note, this promising project allows every individual to regain ownership over its carbon footprint and offset its CO2 emissions.
